APPLIED CHEMICALS
INTERNATIONAL GROUP

Our aim is to present technically preselected and innovative new products for Industry and Environmental Technology.

We want to effectively optimize the processes at our customers and partners enterprises by combining well-engineered and industry-related applications.

Within the business we focus on our most important asset – innovation, experience, enthusiasm and the eagerness of our employees. We could not be such a good partner for our customers and suppliers in the provision of challenging projects without them and without continuity in the field of servicing ongoing projects thereby securing the added value of our applications.

A large number of experienced applications engineers help our customers to solve problems and to optimize processes or take part in new projects within our field of expertise right from the beginning. Our philosophy is to find overall solutions to problems.

In most cases machine engineering is a pre-condition for chemo-technical processes which then creates a synergy with essential chemical reactions.

Therefore it is important for the prospective customer to get an overall offer and an ideal cost-benefit-calculation.

APPLIED CHEMICALS INTERNATIONAL

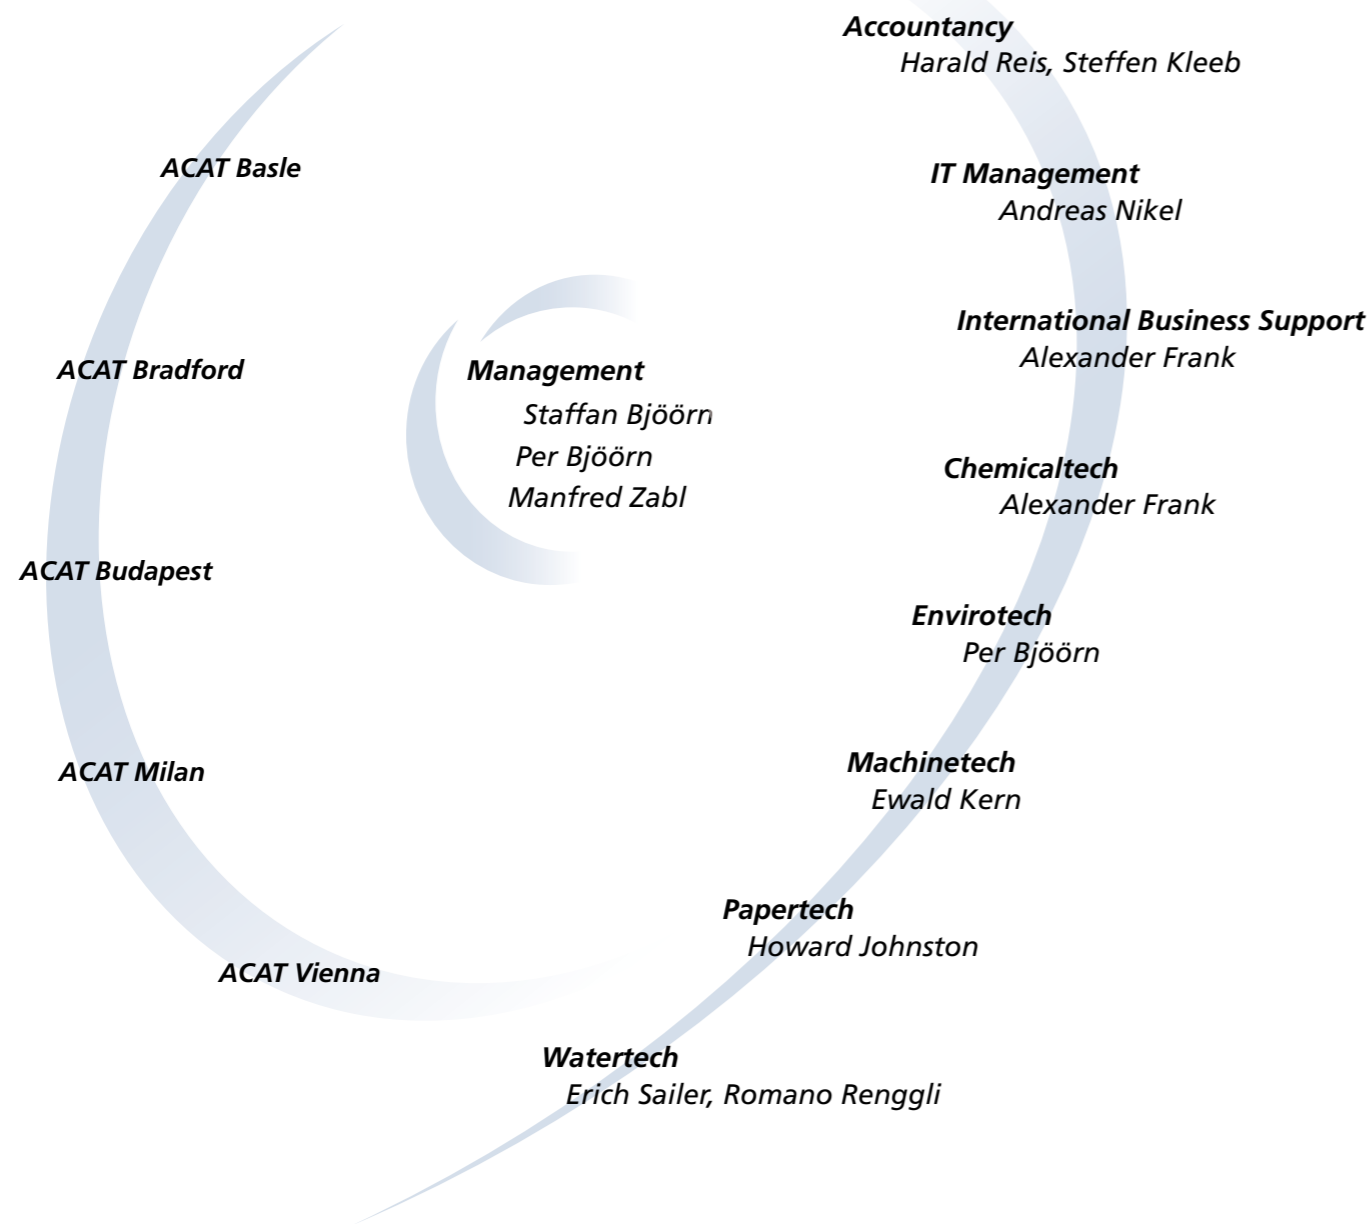

timeline	1994	1995	1997	1998	1999	2000	2001	2005	2010
	Foundation of the first subsidiary of Applied Chemicals International plc: ACAT Vienna with the fields of Paper Technology (papertech) and Environmental Engineering (watertech)	Foundation of ACAT Budapest	Foundation of ACAT Basle	Start of a 3 rd branch: Machinery and Plant Engineering (machinetech)	Start of a 4 th branch: Industrial Chemicals (chemicaltech)	Foundation of the Logistics and Mechanical Engineering Centre in Scheibbs	Foundation of ACAT Milan	Start of the 5 th business segment: Environmental Products (envirotech)	Foundation of ACAT Bradford

On this day we planted an oak tree as a symbol for growth, continuity and environmental care.

Ongoing servicing of projects has top priority in our enterprise so guaranteeing the maintenance of the technical value of our applications.

Complete Solutions and System Components for Mechanical Sludge Dewatering

Process Engineering

Solar Drying Systems

Fully Automatic Belt Drier

Low Temperature Conversion

Components of a Mechanical Sewage Treatment Plant

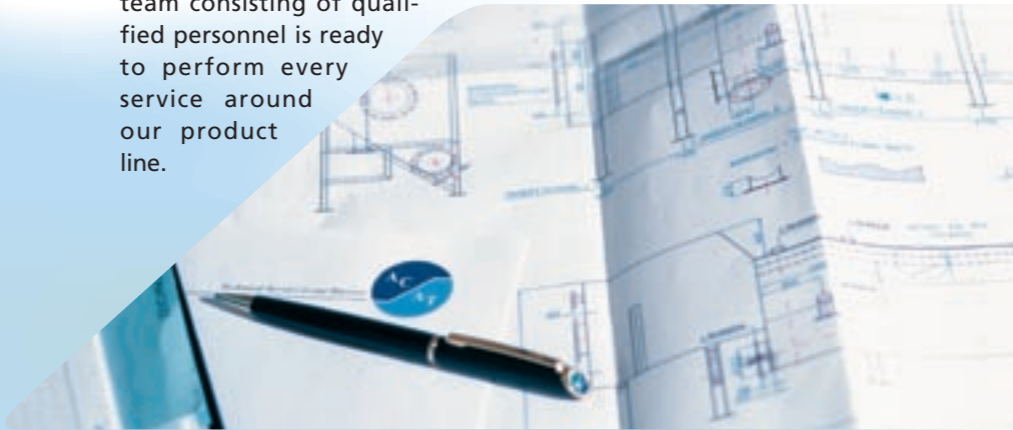

Machinery Service/Spare Part Sales

We are only satisfied, when you are satisfied with us. Take us at our word: it is our declared aim to help you save time and money and to provide you with better quality, efficiency and profitability with regard to your production processes.

To achieve this high standard we run our customer service department as a dedicated business unit.

A competent and reliable team consisting of qualified personnel is ready to perform every service around our product line.

The basis of our successful activities is our long experience in the field of wastewater engineering and the use of optimised technologies. The high quality standard of our products, the reliability in planning and installation, as well as a comprehensive after-sales service will convince you of having chosen the right partner.

Liquid Defoamers

Powder Defoamers and Specialities

Wetting and Dispersion Agents and Additives

Mineral Flame Retarders

Thickeners and Rheology Additives

Pigments and Fillers

Agricultural Products

Filter Aid

Dust Suppression

We supply different additives for paints and building materials as well as special chemicals for the pigment and lacquer industry, the adhesive industry, the synthetic material industry, the building material industry, and for sugar and food production. Our target markets are Austria and Eastern European countries for example; the Czech Republic, Hungary, Slovakia, Slovenia, Romania, Croatia and Serbia. Even the smallest trading units can be immediately put at the disposal of our customers.

We set up priorities in the waste water treatment and sludge treatment.

We invite you to develop with us a tailored and efficient solution for your specific problems in wastewater treatment.

The wide selection of chemicals is available for many different areas of application.

Our target markets are Austria and Eastern European countries.

Flocculants and Coagulants

Ferric and Aluminium Salts

Biochemical Products

Odour Control Aids

Defoamers and Deaeration

Industrial Cleaner

Special Products

Make up and Dosing Systems

Corrosion Inhibitor, Hardness Stabilisation Products, Dispersants, Biocides, Metal Passivator and Chemical Cleaning, Defoamers, Oxygen Scavengers, Alcalization Agents

We advise our customers on the proper selection of products from a wide range of fine chemicals for the treatment of industrial, drinking and wastewater as well as for odour control. Our field service team has extensive knowledge in the field of chemical substances. Apart from technical basic know-how and application-oriented consulting we develop for our customers comprehensive concepts combining ecology and economy and guaranteeing the efficient use of the products.

Our wide range of services encompasses the trade with chemicals, unit engineering with state-of-the-art technologies for purification plants, and wastewater and sludge treatment plants in different branches and industries.

Bentonites

Retention Aid Systems

Fixing Agents and Coagulants

For customers in the paper, cardboard and cellulose industry we supply highly efficient paper chemicals for the production of optimal paper, cardboard and pulp qualities.

A proficient field service team has gathered experience and professional competence for many years in the development and production of products and services within the field of paper technology.

Our range of products includes paper chemicals for retention and dewatering systems, fixatives and bentonites, and also fine chemicals and minerals for wastewater treatment, foam and odour control.

In addition, highly qualified application engineers provide a sophisticated and comprehensive series of processing and dosing units. Thereby we guarantee that customized needs are optimally considered in the production process.

We shall be glad to develop with you the best solution tailored to your needs!

Special products for the waste water treatment, drinking water processing and odour control.

Paper chemicals for the production of optimal paper, cardboard and pulp qualities.

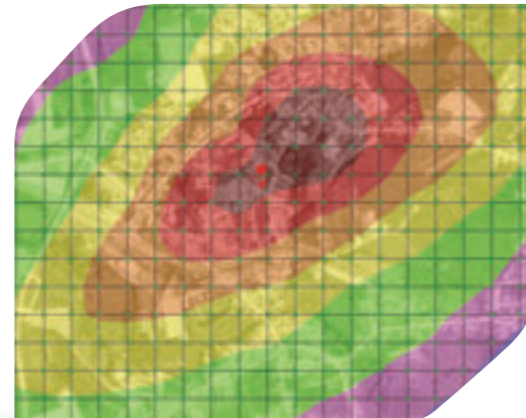

- Flocculants
- Ferric- and Aluminium Salts
- Defoamers and Deaerators
- Coating and Size Press Additives
- Odour Control Aids
- Compression Moulded Centre Plugs
- Machinery and Equipment

The latest specialised business within the ACAT Group helps all our customers in any industry to meet their pollution control goals by managing emissions to air, land and water. We also provide innovative technological solutions to prospective customers in other markets such as: oil and gas refining, chemical and pharmaceutical manufacturing, asphalt industry, food processing and feed production, waste treatment, metal production, rendering or tanning and agriculture

having difficulty with nuisance odour complaints. Our representatives have access to an extensive network of experienced pollution control professionals who can help to identify and quantify emissions to land, air and water which can then be controlled with the appropriate ACAT solution. Applied Chemicals offers a wide and growing range of technologies that can help businesses to become more effective in measuring and controlling their emissions, whilst managing their operations and costs. This includes an atmospheric odour measurement and dispersion modelling system, micro-biological products for land remediation or the improvement of the biological treatment of waste water, compost additives, odour neutralisation products and airborne emission control equipment.

Logistics and Mechanical Engineering Centre

Our aim is to supply you with the right product at the right time in the right place. Our own warehouse at the logistics and mechanical engineering centre Scheibbs allows rapid delivery and the precise tracking of order numbers. Our online delivery tracking service allows us to give you a concrete delivery date whenever you wish.

The “in-house” manufacture of the machinery equipment in Scheibbs is supporting our activities in the field of machinery- and plant engineering.
