

Applied Chemicals International Group
Technical Service is our Success

Delivery Programme
complete overview

acat.com

Flocculants and Coagulants

Solid-liquid separation in the treatment of municipal and industrial wastewater and sludge

Ferric and Aluminium Salts

Phosphate elimination and improving cleaning performance

Specialty Products

Biochemical Products, Adsorbents, Flotation aids, Products for Cooling-, Boiler- and Condensate Systems, Scale Inhibitors, Cleaning Agents

Odour Control

For Odour Control and prevention of corrosion

Polymer Conditioning & Dosing Systems

Virtually maintenance free and for every application

Defoamers and Deaerators

Preventing foaming in wastewater and sludge treatment

Machine Service and Spare Parts

For a reliable working system

Defoamers

For aqueous or partially solvent-based systems in the paint, building material, and adhesive industry

Powder Additives

Defoamers, wetting and dispersing agents, and loss preventer

Wetting and Dispersion Agents and Additives

Various chemical bases for the paint, vanish and adhesive industry and for building chemicals

Agricultural Products

Organic soil improvement additives

Mineral Flame Retardants

Product palette with many applications for the wood panel industry, but also in the cable, rubber, and plastic industry

Thickeners and Rheology Additives

Various chemical bases for the paint, vanish and adhesive industry and for building chemicals

Pigments and Fillers

Inorganic fillers and organic / inorganic pigments and pigment preparations for the paint, vanish and adhesive industry

Waxes

Odour Control Aids and Application Systems for several Industries

From using special odour-control agents in proprietary systems to biochemical products and the targeted dosing of nitrates

Biochemical Products and Compost Additives

Optimizing wastewater treatment, soil remediation and composting processes

Odour Control Systems

Neutralizing many odours numerous application techniques

Dry Strengths Products

increased dry strength, Increased filler content for graphic paper, higher speeds, fewer breaks

Fixing Agents and Coagulants

Stickies reduction and resin control, COD reduction, sludge preconditioning, sizing agent, circuit water cleaning, white pitch treatment

Bentonites

Retention- and drainage systems, pitch and stickies control, waste water treatment

Retention Aid Systems

high-end micro-particle systems with optimal properties in term of formation, sheet formation, retention and dewatering

Flocculants

Developed specially for solid-liquid separation

Defoamers and Deaerators

Foam control in paper and pulp production

Specialty Products

For use in all areas of municipal and industrial wastewater treatment as well as paper and cardboard production

Make up and Dosing Systems

For powder and liquid polymers as well as minerals
